

BJ003

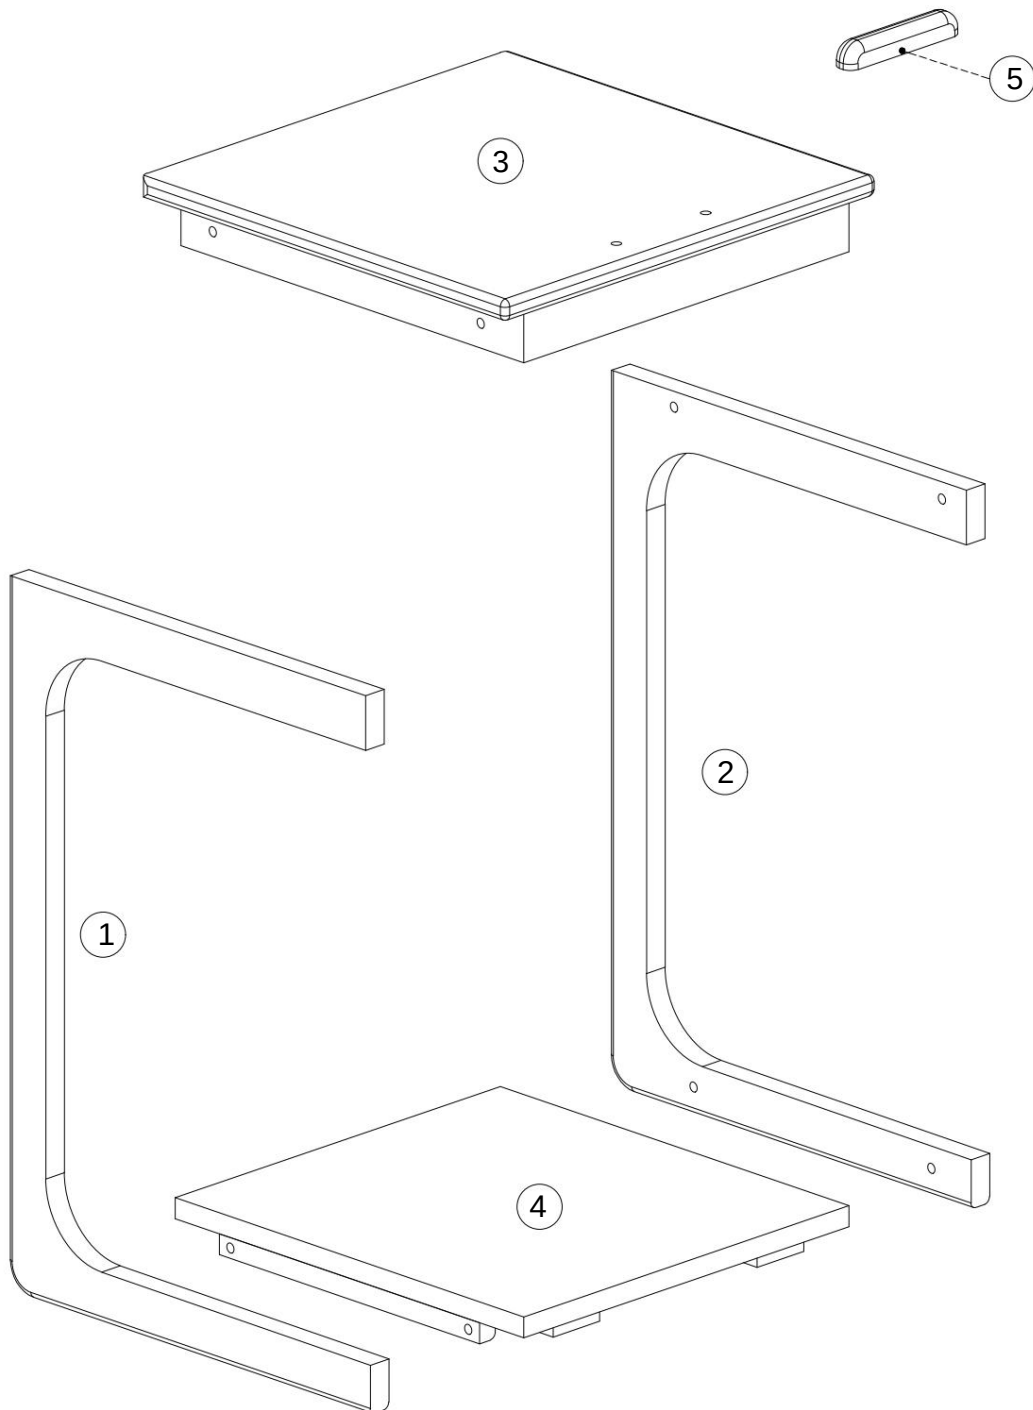

Rolling Side Table 003 C Shape 40CM/15.7inch

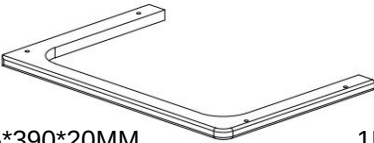

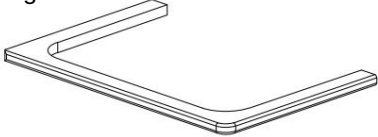

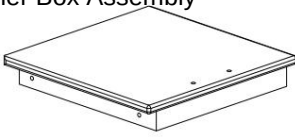

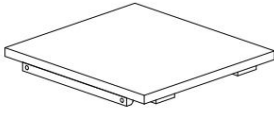

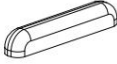

## Installation Diagram

Item No.: BJ003

Specification  
Name: Rolling Side Table 003 C Shape 40CM/15.7inch

Parts List

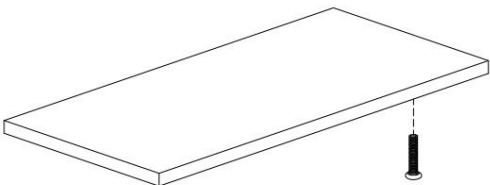

|                                                                                                                                                              |                                                                                                                                                                     |                                                                                                                                                                      |

Before Use:

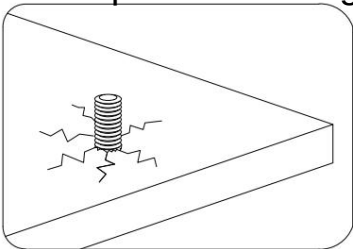

- 1. Open on a soft surface; retain packaging.
- 2. Count and inspect all parts (no cracks or warping).
- 3. Problems? Contact the seller through the order page and provide B.J003 + part code + quantity + order ID + photo.  
Response time: 24 hours or less. Replacement only.
- 4. The smell of new goods is normal: ventilate for 24 hours.

Notice

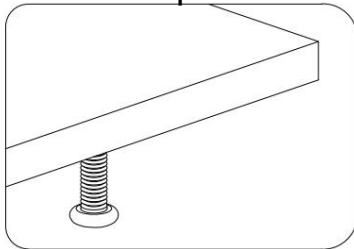

Using the proper screws can prevent damage to these components.

Example

Mistake: Screws can cause boards to split

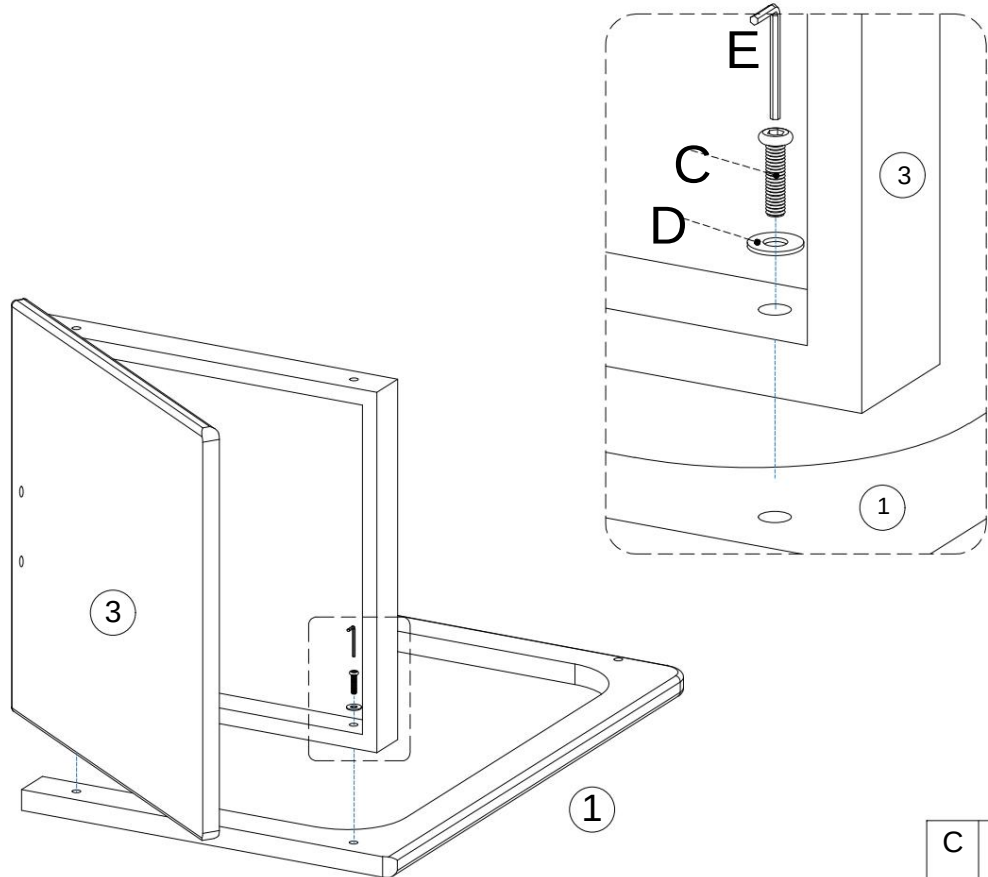

Correct: The screws are the correct size

Specification Name: Rolling Side Table 003 C Shape 40CM/15.7inch

## Hardware List

|                                                                                                                                                                                           |                                                                                                                                                                                         |                                                                                                                                                                                                      |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>A</b>    Open-end Wrench</p>  <p>Opening 14MM                      1PC</p>                         | <p><b>B</b> Swivel Casters with Brakes</p>  <p>Ø25MM, total height 43MM                      2PCS</p>  | <p><b>C</b>            Hexagon Socket Screw</p>  <p>M6*25MM                                              8PCS</p> |
| <p><b>D</b>            Flat Gasket</p>  <p>M6*13MM                                              8PCS</p> | <p><b>E</b>            Hexagon Wrench</p>  <p>M4*100*40MM                                      1PC</p> | <p><b>F</b> Swivel Casters without Brake</p>  <p>Ø25MM, total height 43MM                      2PCS</p>           |

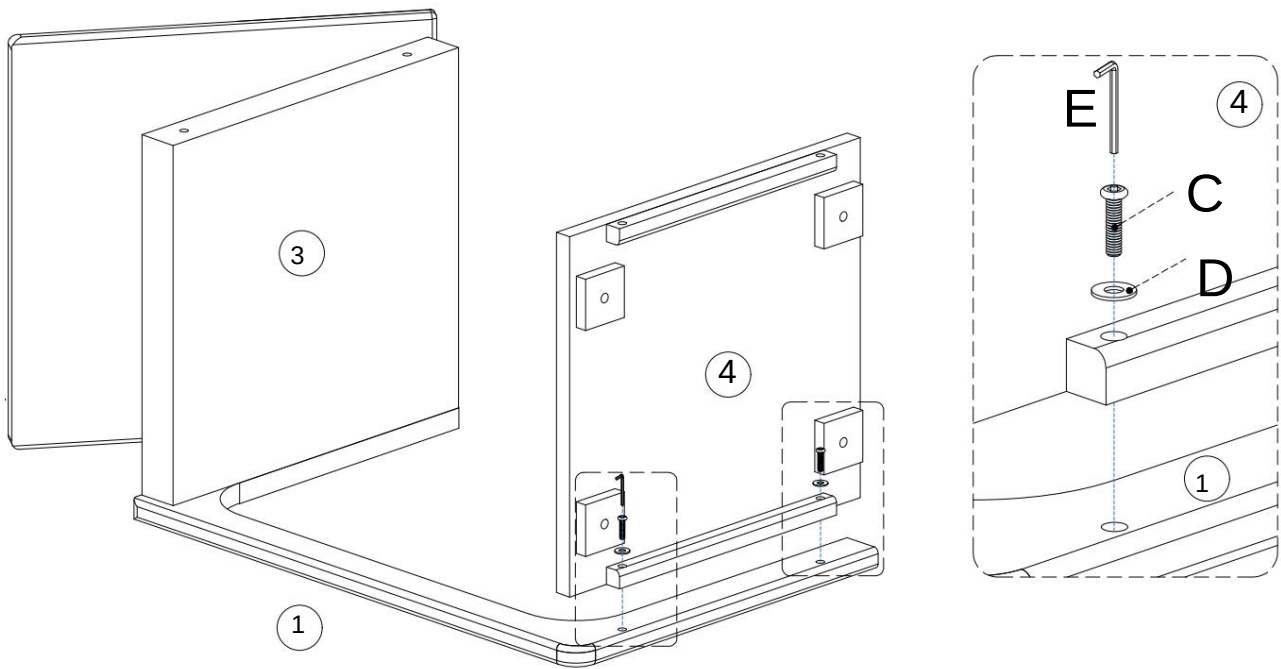

Step 1

Note: After unpacking, please check the instructions to ensure the correct number of components are in the correct order. Then assemble as shown. Align component 3 with the hole on the end face of component 1 and secure with hardware C/D/E.

|   |                                                                                                   |      |
|---|---------------------------------------------------------------------------------------------------|------|
| C |  M6*25MM      | 2PCS |
| D |  M6*13MM     | 2PCS |
| E |  M4*100*40MM | 1PC  |

Step 2

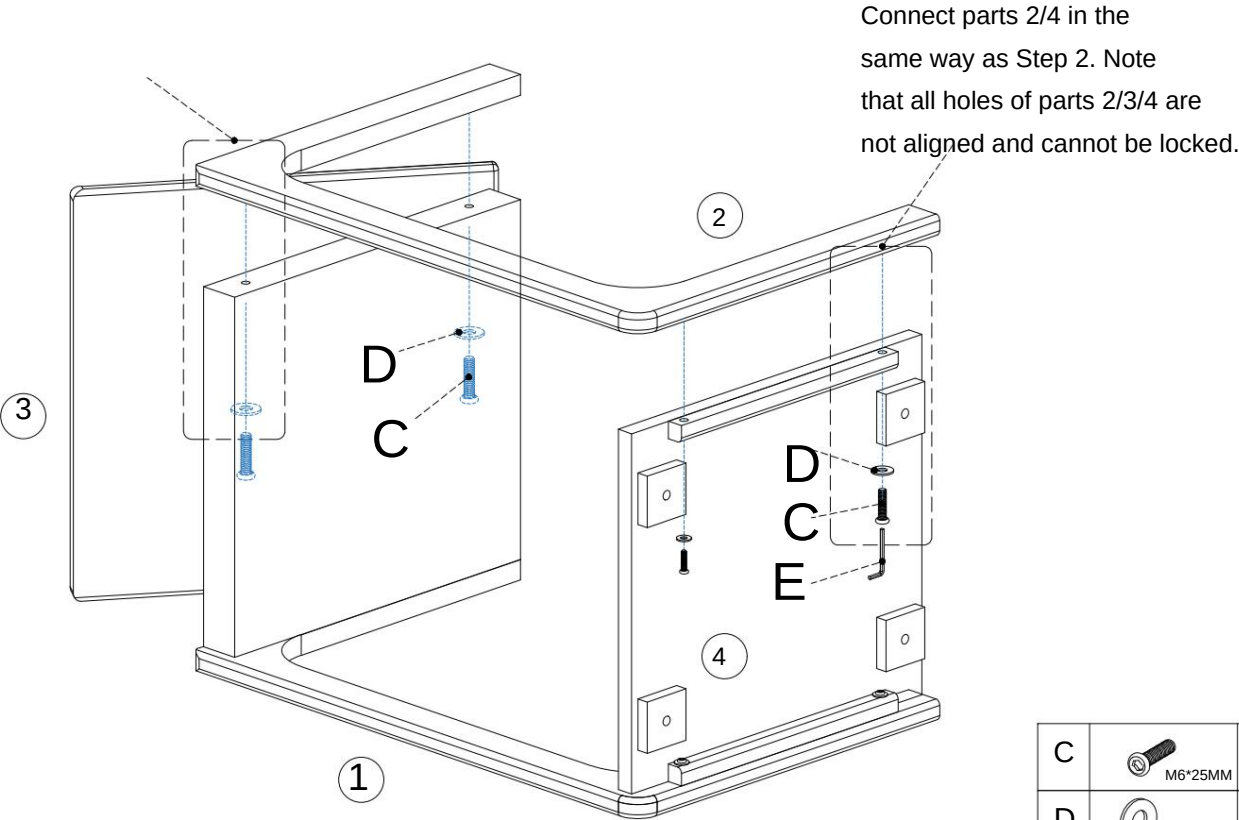

As shown in the figure, use hardware C/D/E to connect component 4 to the components assembled in Step 1.

|   |                                                                                                   |      |
|---|---------------------------------------------------------------------------------------------------|------|
| C |  M6*25MM     | 2PCS |
| D |  M6*13MM     | 2PCS |
| E |  M4*100*40MM | 1PC  |

Step 3

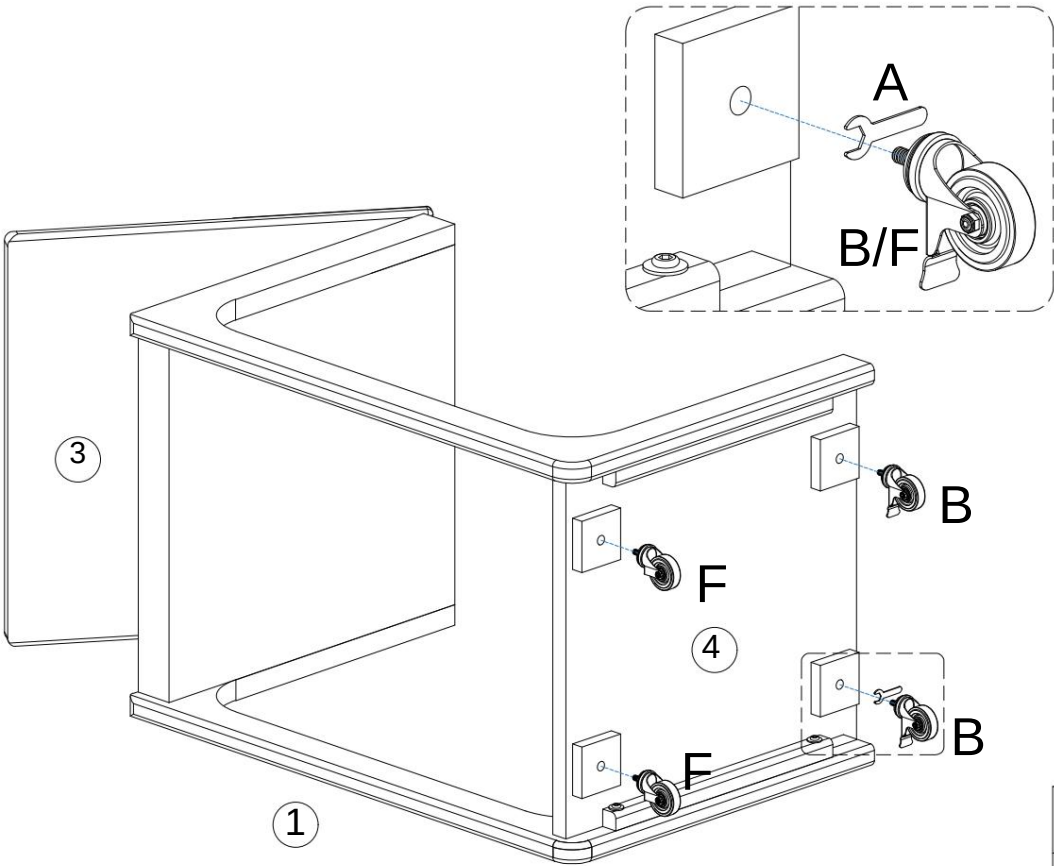

Same assembly method as Step 1 connect components 2/3 pay attention to all holes of parts 2/3/4 cannot lock if not aligned

As shown in the figure, use hardware C/D/E to connect Part 2 to the parts assembled in Step 2. The assembly method is the same as Step 1/Step 2.

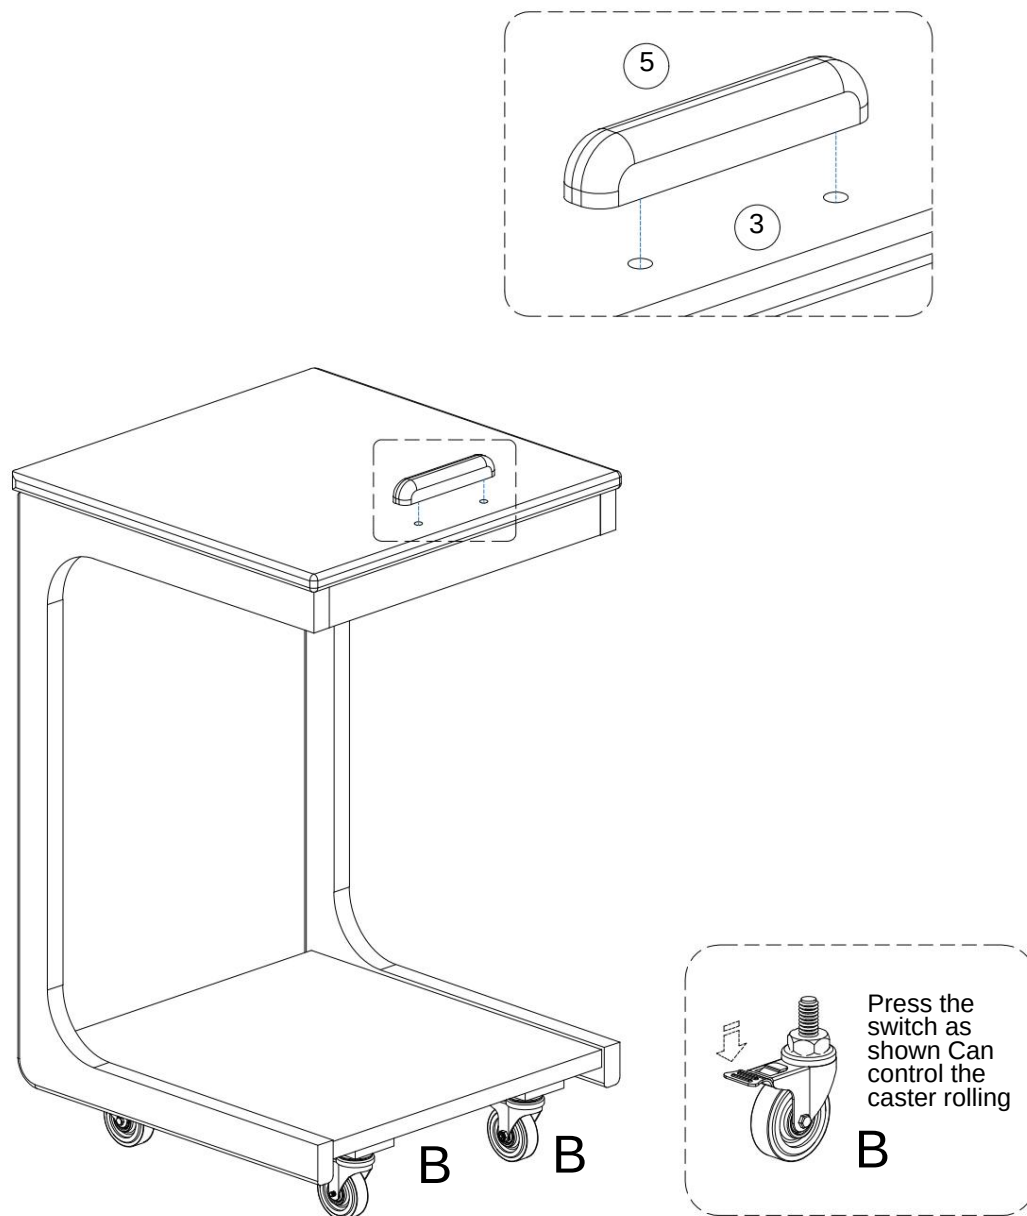

|   |                                                                                                   |      |
|---|---------------------------------------------------------------------------------------------------|------|
| C |  M6*25MM       | 4PCS |
| D |  M6*13MM     | 4PCS |
| E |  M4*100*40MM | 1PC  |

Step 4

|   |                                                                                                                               |      |
|---|-------------------------------------------------------------------------------------------------------------------------------|------|
| A |  Opening 14MM                            | 1PC  |
| B |  Ø25MM, total height 43MM, with brake    | 2PCS |
| F |  Ø25MM, total height 43MM, without brake | 2PCS |

Step 5

Assemble as shown in the figure, install part 5 on the panel, and the assembly is complete.
